FIRE IN THE HOUSES OF PARLIAMENT Jan 2.
FIRE AT MESSRS. HOUSFIELDS', HOUNDDITCH, Jan 7.
FIRE AT THE NEW-CROSS RAILWAY STATION, Jan 9.

THE Fire in the Clock-tower of the Houses of Parliament was caused by ignition of a quantity of timber stored in it, and it was nearly an hour before the Fire could be produced with the help of seven or eight engines, in the immediate vicinity of the Houses. A similar fire in a two-story house recently for the purpose at Vauxhall, and filled with timber and shavings saturated with tar and turpentine, has been extinguished by PHILLIPS'S PATENT FIRE ANNIHILATORS in a few minutes (see *Times* and other morning papers of the 10th January last). This experiment will satisfy the most sceptical that the Fire in the Houses of Parliament, as well as the fires in Houndsditch and at the New-Cross Station, could have been checked and extinguished at their commencement by the use of the Fire Annihilators. Further to satisfy public inquiry as to the efficacy of these machines a demonstration will take place on Thursday next, the 6th February, at Four o'clock p.m. precisely. Orders for admission may be obtained on application to the Secretary, at the Company's Offices, 108, Leadenhall-street.

FIRE ANNIHILATORS.—PHILLIPS'S PATENT MACHINES for extinguishing fire may be had at the Offices of the Company, 108, Leadenhall-street, City, next door to the India House, complete with all necessary apparatus, at the following prices, viz. 3l. 3s., 5l., 8l., and 12l. These machines are of such simple construction that a child can work them, and the vapour emitted from them enables a person to breathe with safety in a room previously filled with flames and smoke, while without it he would be liable to be suffocated.
